Index to Volume 1

Acapnia corneo-retinal potential, 710
Acceleration and venous pressure, 441
Acetyl-β-methylcholine and blood flow, 205
Aerosols, 339
Age and physiological responses to exercise, 683
Agene toxicity, 802
Albumin infusion
  effect on renal function and electrolyte excretion, 671
Alford, W. C., 339
Altitude
  and arterial blood gases, 304
  ceiling of man, 409
  and oxygen transport, 430
  and pressure breathing, 45, 752, 773
  and useful consciousness, 490
Alveolar air relations, 825
Alveolar gas composition during work, hyperpnea, hypercapnia and anoxia, 717
Amberson, W. R., J. J. Jennings and C. M. Rhode. Clinical experience with hemoglobin-saline solutions, 469
Ametropia, pupil size in, 646
Analgesia, nitrous oxide, 254
Anemia and hypoxia, 148
Anoxia tolerance of man, 409
Army rations, field testing, 448
Arterial O_2 and altitude, 409
Asphyxia by carbon monoxide
  heart stimulation in, 364
  resuscitation, 157
Aste-Salazar, H., 304
Atropine and CO asphyxia, 364

Bader, M. E., 205
Bader, M. E. and M. B. Macht. Indirect peripheral vasodilatation produced by the warming of various body areas, 215
Bader, R. A., 575
Barbiturates and marksmanship, 737
Barclay, J. A., R. A. Kenney and M. E. Nutt. Effects of pituitrin and exercise on a water diuresis, 609
Basal metabolism
  and body weight, 385, 395
  at menopause, 629
Bazett, H. C., L. Love, M. Newton, L. Eisenberg, R. Day and R. Forster II. Temperature changes in blood flowing in arteries and veins in man, 3
Bazett, H. C., E. S. Mendelson, L. Love and B. Libet. Precooling of blood in the arteries, effective heat capacity and evaporative cooling as factors modifying cooling of the extremities, 169
Bean, W. B.
  Analysis of subjectivity in the clinical examination in nutrition, 458
  Field testing of Army rations, 448
Bell, D. M., 73
Bennett, A. L., 402
Bishop, G. H., M. H. Clare and J. Price. Patterns of tremor in normal and pathological conditions, 123
Bixby, E. W., 242
Blood
  arterial, and environment, 304
  arterial, oxygen saturation, 560, 567
  electrolyte changes and hyperventilation, 848
  elimination of carbon monoxide, 350
Blood pressure
  and exercise, 683
  and hemoglobin-saline injections, 469
  response to epinephrine, 856
Blood flow
  and acetyl-β-methylcholine, 205
  basal and maximal rates, 234
  and temperature, 3, 20, 169, 205, 215, 234
Blood-gas relationships in the lungs and alveolar air, 825
Blood gasses, and hyperthermia, 496
Blood glucose and hunger, 643
Blood volume
  and acclimatization to heat, 242
  and seasonal changes in environmental temperature, 227
Body build and heat production, 385, 395
Body position and motion sickness, 619
Body weight and heat production, 385, 395
Boone, B. R., E. F. Randak, G. F. Ellinger and M. J. Oppenheimer. Electrokymographic studies of the ventricular isometric relaxation phase of the cardiac cycle in man, 534
Botelho, S. Y., 586
